

An upper ridge will be rebuilding over the province today bringing generally stable and more seasonal conditions. Slight warming in the northwest boreal but slight cooling elsewhere can be expected in behind a cold front that passed through the eastern and southern Alberta. Moderate to strong and gusty SE-SW winds of 20-25G40-45 will become mainly strong SW 30-35G50-60km/h during the night. Mostly moderate to high RH values in the range of 30-50% can be expected in all zones. Fire danger will remain generally moderate in the province.

On Saturday, upper ridge slightly weaken and shift east. Mainly seasonal conditions are forecast to continue in the province with stronger and gusty W-SW winds of 30-35G50km/h persisting in the boreal zones. East slopes will see mainly SW wind of 20-30G35-55km/h early in the day and may weaken through the late afternoon. Mostly moderate to high humidities are expected in all zones. Fire danger remain generally moderate in the province.

Outlook for Sunday: Upper ridge will rebuild toward the province maintaining stable and seasonal conditions. Winds will become mainly light SE-SW across the province. Max temperatures will remain near range of 8-14C with mostly moderate RH values.

Outlook for Monday: Upper ridge will peak over Alberta maintaining stable and seasonal conditions in all zones. Light to moderate SE-SW winds with mostly moderate humidities will continue in all zones.

Forecast of Temp, RH, and wind for tomorrow afternoon; precipitation for next 24 hours
